### ABOUT ME

Currently, I am pursuing B. Tech Computer Engineering degree in 2nd year at Birla Vishwakarma Mahavidhyalaya, Vidyanagar. I have attended many seminars and webinars in my college and learnt about career objectives.

### EXPERIENCE

#### Hactoberfest 2025 Super contributor

I have completed Hactoberfest open-source software development which is global level event organized by DigitalOcean and achieve Super contributor Rewards and T-shirt. I have planted a tree that also my contribution.

#### Tic Tac Toe Hackathon 2025 Backend Developer

I learnt how to do project & how work together because it is my 1<sup>st</sup> hackathon. In this project, we make an Career Compass which guides students for the career integrate with AI chatbot. Outcome of this hackathon, I implement backend using PHP & database using SQL in simple projects.

#### Odoo Hackathon 2026 Froentend & Database

I participated in the Odoo Hackathon where I worked on developing a frontend technologies and database integration. We built a full-stack Budget Accounting System with a clean dashboard, real-time data handling, secure authentication, and PDF invoice generation — designed for real-world rental businesses.

#### Meta X HuggingFace Hackathon 2026 Docker & OpenEnv Setup

I took part in the Meta x HuggingFace Hackathon, focusing on deploying and managing applications using Docker and OpenEnv. I worked on containerizing applications to ensure scalability and consistency across environments. Through this hackathon, I gained practical experience in DevOps concepts, environment configuration, and efficient deployment of AI-based solutions.
